

# Jazmine Rizo

Experienced Software Developer adept in bringing forth expertise in design, data manipulation, testing and maintenance of software systems. Proficient in various platforms, languages, and embedded systems. Experienced with cutting edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

## Employment History

### Software Engineer at COMET Informatics LLC, Pittsford, NY

JULY 2022 – MAY 2024

#### COMET (Comprehensive Mentoring Technologies) Informatics -

A child-centric software that specialized in the assessments, outcome measures, and organizational data of child-serving organizations.

- Took large quantities of client data and quickly converted it into meaningful information to help drive the improvement and outcomes of students, also teachers, and different programs.
- I developed and maintained a scalable, high-availability web application that handled 60,000+ concurrent users with minimal downtime in multiple programming languages, such as C#, SQL, and JavaScript.
- Experience with APIs built with technologies like ASP.NET MVC, and experience with relational data use within Entity Framework data access layers for .NET (C#) applications.
- Met with clients directly within SPCC (Society for the Protection and Care of Children) and Children's' Institute to assess their requests and expectations for creating or updating reports in their account.

#### Specifics:

- Developed new web pages using client-side and server-side markup languages like JavaScript and Razor.
- Improved JavaScript front-end functionality.
- Created and maintained processes within EDI (Electronic Data Interchange) for the import of document data into our database.
- Bug fixes.
- Improved reports and database performance through query optimization and indexing.
- Often deployed work to Production environment.

## Education

### Certification - Full Stack Web Development at Centriq Training, Kansas City

JANUARY 2021 – APRIL 2022

Created interactive UI applications using REACT that leverage a .NET Web API as the back end of the applications.

- Project history tracked using Git and utilized the create-react-app Command Line Interface (CLI) to generate the shell for the projects.
- Projects contain imported Bootstrap and Axios code packages as resources.
- Created the necessary components to allow users to display or not display completed tasks, to allow users to filter components by category and add, edit or delete categories.

Created .NET Web APIs .

- Created RESTful APIs that are consumed by another application. It provides all necessary endpoints to allow the consuming application to have full CRUD functionality.
- Created relational database to store data, and created the data layer within the project of the web application that utilizes Entity Framework to create domain models for the database objects.

Created e-commerce and Scheduling Admin tool MVC web applications.

- Implemented authentication for these applications using Identity Samples.
- Created relational database to store data, and created the data layer within the project of the web application that utilizes Entity Framework to create domain models for the database objects.
- Built metadata buddy classes in the data layer of the app.
- Utilized AJAX and CRUD functionality, along with custom error handling within the project.

Worked with client in need of a web application for her Grief Recovery Specialist services.

- Worked with a team of developers to assist client with the creation of their new website.
- Communicated with client directly to determine their needs and design preferences, creating code for the front and back-end of their website.
- Still currently maintaining communication with team members and supervisors concerning the direction of the website post graduation, free of charge.

### What makes me stand out from other web developer candidates for this position?

I have excellent analytical and problem-solving skills that get me through many challenges. Even those that I may not initially know the solution to. My previous colleagues will tell you that I was always optimistic and put an immense amount of time and effort into furthering my knowledge and learning new concepts. I am very enthusiastic about learning!

The knowledge I have obtained so far, paired with my enthusiasm to keep learning and growing makes me a very strong developer that would be perfect for any company dedicated to the empowerment of their employees to reach their fullest potential. With that dedication, I can provide an endless amount of success to your company.
